

**Short Training Course
On
Professional Certificate in Teaching Methods**

Course type : Professional Certificate in Teaching Methods
Co-designed by: CamTech University and Phnom Penh Teacher Education College
Hosted by : Faculty of Arts, Humanities and Social Sciences, CamTech University

1. Introduction

Unlock the door to a future-ready classroom with our groundbreaking Professional Teaching Courses on Professional Teaching Methodology. Crafted in collaboration between CamTech University and Phnom Penh Teacher Education College, these dynamic courses promise to revolutionize your teaching approach and empower you with the tools needed to excel in the digital age.

In today's ever-evolving educational landscape, traditional teaching methods simply aren't enough to captivate and inspire students. As technology continues to shape the way we learn and interact, educators must embrace innovative pedagogies and harness the power of digital tools to engage learners effectively. In this regard, CamTech University, in collaboration with Phnom Penh Teacher Education College, jointly offers two Professional Teaching Courses on ***(1) Innovative Teaching Methods*** and ***(2) Technology-Assisted Teaching Methods*** to upgrade teaching skills of teachers and enhance the students' learning experience.

Aligned with Cambodia's vision for digital literacy and educational advancement, our course is designed to equip educators with cutting-edge strategies and techniques to transform their teaching practices. Rooted in the Cambodia Digital Economy and Society Policy Framework 2021-2035, our program aims to promote digital literacy, skills, and access for all Cambodians, including students at the general education level. Moreover, our course aligns with key educational policies and strategies, including the Policy on STEM Education 2016 and the Policy and Strategy on ICT in Education 2018, and ICT Masterplan 2020, to drive excellence and innovation in education, particularly in secondary schools, as outlined in the Cambodia Education 2030 Roadmap for Sustainable Development Goal 4.

Through a dynamic blend of hands-on workshops, collaborative projects, and interactive discussions, our expert trainers will guide participants through the seamless integration of emerging innovative pedagogies and technologies into their teaching practices. Whether you're a seasoned educator or a recent graduate, our course offers invaluable insights and practical skills to elevate your teaching to new heights. From personalized learning experiences to interactive digital resources, participants will explore a diverse range of transformative pedagogies and technology integration tailored to meet the unique needs of today's learners.

2. Purposes

- Equip educators with innovative pedagogical approaches and technology integration strategies to create engaging and effective learning environments.
- Foster a culture of continuous improvement by providing teachers with the tools and knowledge necessary to adapt to evolving educational needs and trends.

3. Expected Learning Outcomes

Upon completion of these courses, participants will be able to:

- Master a diverse range of pedagogical techniques and technology integration methods to enhance student engagement and academic performance.
- Develop the capacity to critically analyse and evaluate the impact of technology on teaching practices, allowing for informed decision-making and adaptation.

- Cultivate a dynamic and inclusive classroom environment that accommodates diverse learning styles and fosters student success.
- Harness the power of data-driven insights to optimize teaching strategies and tailor instruction to meet the individual needs of students.
- Demonstrate proficiency in leveraging digital tools and platforms to facilitate collaborative learning experiences and foster a culture of innovation in education.

4. Course Outlines

4.1. Innovative Teaching Methods (45 hours = 3 credits): This course explores cutting-edge pedagogies, learn how to create engaging lessons, and develop strategies for diverse learners. By the end of this course, you will be able to:

- **Innovate Your Teaching:** Explore the role of teachers in the 21st century and introductory principles of innovative teaching methods.
- **Design Engaging Lessons:** Build upon your understanding of innovative teaching by learning instructional design principles for effective learning and classroom management.
- **Integrate Technology:** Discover how to effectively incorporate technology into your teaching practices, using learning theories and diverse learner strategies to enhance your instruction.
- **Evaluate Student Progress:** Apply your knowledge by understanding how to assess and evaluate student learning, including incorporating technology into your assessment methods to measure progress.
- **Create a Mastery Project:** Demonstrate your mastery of innovative teaching by creating a final project that showcases your skills and knowledge, incorporating all that you've learned throughout the course.

4.2. Technology-Assisted Teaching Methods (45 hours = 3 credits): This course discovers how to integrate technology into your teaching practice, learn about LMS and learning management, and develop multimedia presentations. By the end of this course, you will be able to:

- **Integrate Technology Effectively:** Learn how to effectively integrate technology into your teaching practice, from introductory principles to hands-on application.
- **Master Learning Management Systems:** Understand how to use learning management systems and develop strategies for managing digital content and resources.
- **Design a Digital Classroom:** Discover the role of technology in education, including instructional strategies, diverse learning styles, and educational tech applications.
- **Create Multimedia Presentations:** Develop engaging multimedia presentations, digital content, and learn about the use of video, AR, and VR in the classroom.
- **Teach in the Digital Age:** Apply your knowledge by creating a final presentation that showcases your ability to effectively integrate technology into your teaching practice.

5. Trainers

The program will be delivered by highly qualified and experienced trainers from CamTech University and Phnom Penh Teacher Education College.
